Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary Examiner Cuong Q Nguyen 2811 Th MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-20 insofar as in compliance with 35 U.S.C 112 are rejected under 35 U.S.C. 102(e) as being anticipated by Bronner et al. (US 6,037,194).

Regarding claims 1, Bronner et al. discloses a memory cell comprising: a trench capacitor formed in a substrate (205); a shallow transistor trench STT (230) formed in the substrate, wherein the transistor including a firs diffusion region (110) couples the transistor to the capacitor, a second diffusion (235) couples the transistor to a bit line (290); the gate (225) serving as a word line including a buried portion and a non-buried

Serial Number: 09/669,585

L.

Art Unit: 2811

portion, wherein the buried portion of the gate occupies the STT a gate dielectric (905) having portions lining the STT, wherein one side of the gate dielectric is in contact with the buried portion of the gate and an opposite side of the gate dielectric is in contact with the first diffusion region (110). See Bronner et al.'s Fig.19.

Regarding claims 2, 3, and 5-8, as shown in Bronner et al.'s Fig.19, the non-buried portion of the gate is greater than a width of STT. It is noted that the non-buried portion of the gate has a width of a lithographic groundrule (F) (col.10 line 5), so the width of STT is less than a lithographic groundrule.

Regarding claim 4, as shown in Bronner et al.'s Fig.19, the first diffusion region (110) is located in a region of the substrate between the trench capacitor and STT, and an interface of the STT and the substrate between the first and second diffusion regions formed a channel of the transistor.

Regarding claims 9, 11, Bronner et al. teach that the gate (225) is formed of doped polysilicon and the gate includes a salicide layer (295) on the polysilicon. Col.10 lines 40-60.

Regarding claims 10, 12, as shown in Bronner et al.'s Fig.19, a cap layer (275) formed over the non-buried portion of the gate.

Regarding claims 13-20, as shown in Bronner et al.'s Fig.19, the memory cell further comprises a dielectric layer including an extending portion of dielectric layer (410) and a dielectric layer (420, an oxide layer. Col.9, lines 60-67) on upper portion of Serial Number: 09/669,585

Art Unit: 2811

the trench capacitor, wherein the dielectric extending to pass an edge of the trench capacitor to a first edge of the STT.

The limitation "the dielectric layer serves as a self-aligned mask to form the STT" in claims 15 and 19 is considered as a "functional language". Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. In re Danley, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does ."(emphasis in original) Hewlett - Packard Co . v. Bausch & Lomb Inc., 15 USPQ2d 1525, 1528 (Fed. Cir. 1990).

Response to Arguments

2. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of new ground of rejection.

Conclusion

3. Papers related to this application may be submitted to Technology center (TC) 2800 by facsimile transmission. Papers should be faxed to TC 2800 via the TC 2800 Fax center located in Crystal Plaza 4, room 4-C23. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Group 2811 Fax Center number is (703) 308-7722 and 308-7724. The Group 2811 Fax Center is to be used only for papers related to Group 2811 applications.

4. Any inquiry concerning this communication or any earlier communication from the Examiner should be directed to CUONG Q NGUYEN whose telephone number is

(703) 308-1293. The Examiner is in the Office generally between the hours of 6:30 AM

to 5:00 PM (Eastern Standard Time) Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor TOM THOMAS who can be reached on (703) 308-2772. The fax phone

number for the organization where this application or proceeding is assigned is (703)

308-7722 or 308-7724.

Any inquiry of a general nature or relating to the status of this application should be

directed to the Technology Center Receptionists whose telephone number is 308-0956.
